

NEVADA ALTERNATE ASSESSMENT OBJECT EXCHANGE LIST

All accommodations used during the administration of the alternate assessment should align with what the student receives in everyday classroom instruction. An allowable accommodation on the Nevada Alternate Assessment is that real objects may be substituted for pictures in the response booklets. An Object Exchange List has been prepared indicating where real objects may be substituted. All objects listed are usually found in the classroom or school setting. Use your professional judgment about which objects will be safe and appropriate for your students to handle (e.g., scissors, food). Objects should be substituted with those that the student is familiar with and uses in daily instruction. Objects can be of any type and size (e.g., any type of book such as a textbook, reading book, etc.). If specific objects are listed, an explanation is provided in the "Replacement Objects" column (e.g., a real flower of any kind, not plastic). Objects are listed only if all stimulus pictures and/or response options within a trial can be replaced with real objects.

Recommendation: Shapes may be replaced with pattern blocks or created using cutouts from sturdy paper such as card stock/foam board or by using a sewing tracing wheel to create raised lines. Fraction manipulatives or cutouts may be used for fraction items. The same shapes, blocks, and other objects may be used across all items as long as they match the description.
